

Prolonged Field Care Casualty Card v25 (8July2023)

Day																										DAY	
Hour																										HOUR	Treatment / Prompts - Checklist
Minute																										MIN	Send MIST Report
Charting Key:	Other																									Other	Stop Massive Bleeding
	140																									140	Pelvic/feet Binder
Use either the letter or symbol consistently	135																									135	Convert TQ <4hrs
	130																									130	Open Airway
	125																									125	Needle-D / Finger-T / Thoracostomy
	120																									120	Initiate Blood Transfusion
BP	115																									115	TXA 2g Slow Push (within 3 Hrs)
	110																									110	Calcium
(s) Systolic ∨	105																									105	2nd IV/IO
(d) Diastolic ^	100																									100	Peripheral Pulses
(t) F-Temp X	99																									99	Hypothermia Treatment / Prevention
	98																									98	Analgesia Management
	97																									97	Procedural Sedation
	96																									96	Antibiotics / War Wound Therapy
(2) SPO2 ◊	95																									95	Irrigate / Debride / Dress Wounds
	94																									94	Tetanus Status
	93																									93	Reduce / Pad / Splint Fracture
	92																									92	Position / Pad Patient
(p) Pulse ●	91																									91	DVT Prophylaxis
	90																									90	Fasciotomy
	85																									85	Confirm TBSA & Fluids for Burn
	80																									80	Escharotomy
(m) MAP Δ	75																									75	Teleconsult Prep & Call
	70																									70	Expose Patient
	65																									65	Reassess All Treatments
	60																									60	Ultrasound EFAST, RUSH, ONDS
(SI) Shock Index SI = HR / Sys	55																									55	Detailed Exam
	50																									50	Attach Monitors
	45																									45	GCS/Neuro/MACE
	40																									40	NG/OG Tube
(e) ETCO2 ▪	38																									38	Upgrade / Secure Airway
	37																									37	Awake / Post-Cric Checklist
	36																									36	BVM or Vent w/ PEEP
	35																									35	Pressors for Distributive Shock?
(t) C-Temp X	30																									30	Foley / Bladder Tap
	25																									25	UA Dipstick
	20																									20	Labs (if available)
	15																									15	Adjust Ventilator Settings (ABG?)
(r) Resp ◊	10																									10	X-Ray / Imaging
	5																									5	PreOp Eval
	Null																									Null	Amputation
	Urine Output																										
Fluid Input																											Preperitoneal Pelvic Packing
RASS/ Pain Scale																											Clear C-Spine
AVPU/Neuro/MACE2																											
Eye response	4																										Nursing Care Reminders
Oral Response	5																										VITALS (as often as needed)
Motor Response	6																										T, P, R, BP, SPO2, ETCO2
GCS Total	15																										INs/OUTs
Drug/Intervention:																											IV/IO/NGT/OGT/Foley/Stool
Drug/Intervention:																											Pain/Sedation
Drug/Intervention:																											Maintenance & Procedural Bumps
Drug/Intervention:																											Drips (Pain or TIVA/Sedation)
Drug/Intervention:																											HEENT
Drug/Intervention:																											Suction/Clean/Moisten
Drug/Intervention:																											Eye/Nose/Mouth/Ears
Drug/Intervention:																											Respiratory
Drug/Intervention:																											Look/Listen/Feel
Drug/Intervention:																											BVM/Vent/Oxygen
Drug/Intervention:																											Integumentary
Drug/Intervention:																											Look/Touch/Smell
Drug/Intervention:																											Position/Padding/Move/Massage
Drug/Intervention:																											Clean/Dry/Dress/Drain/Cover
Drug/Intervention:																											Gastrointestinal
Drug/Intervention:																											Look/Listen/Touch/Tap
Drug/Intervention:																											Nausea/PPI/Nutrition
Drug/Intervention:																											Extra
Drug/Intervention:																											Battery/Power
Drug/Intervention:																											Stock/Resupply/Buy
Ventilator Mode																											
Flow Rate	IFR/LPM																										
Tidal Volume	Vt																										
Vent Rate	RR																										
Percent O2	FIO2																										
PEEP	PEEP																										
Plateau Pressure	Pplat																										
Drive Pressure	ΔP=Pplat-PEEP																										
Peak Inspiratory Pressure	PIP																										
In to Out Ratio	I:E
